説明			
<p>when you look at a revision page @ /projects/projectname/repository/revisions/ would it be possible to link the folder structure in the files section through to the relevant folder in the repository (most likely in the same revision)</p> <p>as for one of my projects, we would like to see all the other files in that folder and it would be easier to find if that linked straight through</p> <p>journals</p> <p>I'm not sure I understand your problem. If I'm at http://www.redmine.org/projects/redmine/repository and click on <u>trunk</u>, I get to http://www.redmine.org/projects/redmine/repository/show/trunk, which contains a list of the files in the directory.</p> <p>for example im referring to this page [[[http://www.redmine.org/projects/redmine/repository/revisions/3609]]]</p> <p>to link through to trunk, config and locales, in the files section showing the differences</p> <p>This shouldn't be too hard, though I haven't had a chance to look at the code and I won't be able to in the next few days. I'll let JPLang or Eric Davis take care of that.</p> <p>Hi, This is a patch to link folders on a revision view. Please try it.</p> <hr/> <p>nope didnt work?</p> <p>running 0.9.3</p> <p>Theo Silelidis wrote:</p> <p>nope didnt work?</p> <p>running 0.9.3</p> <p>I tested the patch with trunk+git and 0.9.3+subversion. And it worked fine for both situation.</p>			

What SCM do you use?

use subversion, and used tortoissvn to apply the patch
maybe send me the full file for 0.9.3, would be appreciated

thanks

use subversion, and used tortoissvn to apply the patch
maybe send me the full file for 0.9.3, would be appreciated

thanks

This is the full file for 0.9.3

Please try it again.

yip there we go, thanks working 100s

Feature committed in trunk in r3659. Will wait 0.9.5 to merge into 0.9-stable.

Merged into 0.9-stable.
