説明 It would be nice if an issues' start date and/or due dates could simply be tied to a product version/milestone, instead of (or at least, in addition to) a fixed date. This way, the milestones' dates can be moved around and all the issues start/due information tracks accordingly.			
journals Eric Davis's [[Plugin_List#Issue-Due-Date-plugin Issue Due Date Plugin]] might be just the thing. +1 It makes no sense to have individual Due dates for Issues, when they are assigned to a Version. The "Issue Due Data" plugin does what I was looking for. Please include this Plugin permanently in Redmine as it is good feature for everyone.			
related_issues relates,New,7626,version due date and issue due date interactions relates,New,6366,Due date on an issue should follow the associated release due date if it exists relates,New,251,Patch for Feature Request #9785 (Default issues due date == assigned target version date)
