Links within a Wiki are one of the most fundamental requirements so creating links between pages should be a breeze.

One of the biggest hurdles to Wiki productivity as I see it is having to manually create and edit internal wiki page links.

I suggest:

Extending the WYSIWYG link function to provide a simple internal page selection function for the new link i.e. page tree, recent pages, search for page

Allow for external links or manual entry as default, i.e. option 1) enter the URL for the link, or option 2) link to this page (issue) ...

I tried to explain the functionality in the comment I made 11 month ago in #617 here:
http://www.redmine.org/issues/617#note-16

+1

Category should be "Wiki".
