<b>説明</b>			
Operation:			
<ol style="list-style-type: none"> <li>1. Create a folder in SVN's repository. The folder's name includes square brackets, such as [dir1].</li> <li>2. Add something (files and/or folders) into the folder created above.</li> <li>3. Confirm them can be displayed correctly by SVN's client.</li> <li>4. In Redmine's repository, click [dir1] to display its content.</li> </ol>			
After step4, the The entry or revision was not found in the repository. is displayed.			
Environment:			
<ol style="list-style-type: none"> <li>1. Client(WinXP):TortoiseSVN</li> <li>2. Server(RHEL5):CollabNet Subversion(1.6.6) + redmine(0.9.4) + Postgresql(8.4.3)</li> </ol>			
journals			
<b>I was able to reproduce this.</b>			
I have same problem.			
SCM: Subversion			
URL: <a href="http://10.121.120.15/svn/ChoSEE/src/mkend/src/">http://10.121.120.15/svn/ChoSEE/src/mkend/src/</a>			
Login: wwyhy			
Password: 123456			
I got below error:			
<b>The entry or revision was not found in the repository.</b>

SCM: Subversion			
URL: <a href="http://ip/svn/test/src/md/src/">http://ip/svn/test/src/md/src/</a>			
Login: wwyhy			
Password: 123456			
I got below error:			
The entry or revision was not found in the repository.			

---

The basic problem seems to be an incompatibility of the URL RFC1738 and Ruby's URI.escape. The former assumes square brackets unsafe, the latter treats them as safe characters. Therefore they are not properly escaped when building the SVN URL.

I will try to add a failing test and add the necessary escaping.

In the mean time I have added a "bug report to Ruby":

<http://redmine.ruby-lang.org/issues/show/3457>.

Attached you may find a patch adding a test case and a possible fix.

I had to change the svn test repository, so please regenerate it after applying the patch with

```
rm -fr tmp/test/subversion_repository
```

```
rake test:scm:setup:subversion
```

For those preferring git, here is the same patch in gits format-patch format.

Please note, that the fix breaks support for IPv6-Urls. But I think those are currently less likely to occur than square brackets.

IPv6 support may be fixed once "Ruby issue #3457":

<http://redmine.ruby-lang.org/issues/show/3457> is solved.

Another functional test was affected by the change in the test repository. Attached are updated patch files.

Committed in r3800, thank you for the bug report and patch.
