<b>説明</b> app/views/issues/_sidebar.rhtml still uses :controller => 'issues', :action => 'calendar' although Calendar has been moved into the separated controller. so this patch is to use 'calendars' controller with 'show' action.			
journals sorry, forgot to add information: <ul style="list-style-type: none"><li>branch: trunk (dev)</li></ul> * revision: r3750  This is a small fix which can be / should be included in 1.0.1 too imho.  Thanks for reporting this Andrew.  Fixed in r4012, thanks for finding that.  Merged to 1.0-stable.
