説明

in `lib/redmine/default_data/loader.rb` and all `config/locales/` files `default_role_developer` variable is misspelled

examples:

`lib/redmine/default_data/loader.rb`

```
developer = Role.create! :name => I(:default_role_developer)
```

`config/locales/en.yml`

```
default_role_developer: Developer
```

for clarity purposes *developer* should be correctly spelled as *developer*

redmine version: latest trunk r3813

journals

The attached patch renames all occurrences of @developer@ to @developer@.

I was wondering if developer was the French spelling or something. I'll add this to 1.0.

Committed in r3820. Thanks for the patch.
