Redmine 0.9.4.devel.3764 (MySQL)

When using the popup calendar in Chrome, you cannot advance more than one click (month/year). If you advance twice, the popup calendar goes blank. I can recreate this bug even here (see attached screenshot)

This doesn't happen in Firefox.

journals

I can confirm the issue on Chrome 5.0.375.86 on OSX 10.6. The error message is "Uncaught illegal access in @/javascripts/calendar/calendar.js?1277038037:1108@"

The issue is the same as http://code.google.com/p/chromium/issues/detail?id=43973. The proposed fix in this ticket solves the issue for me. I transformed it into a patch to Redmine and attached it here.

Perfect, that fixed it.

Eric, could you please commit this patch?

I didn't have any issues with Chrome 5.0.342.9 beta on Linux but this does look like a JavaScript coding bug; Applied in r3822.
