説明			
<p>This hook is called in quite a few places, but in order to get my "Git Revision Download": http://redmine.debuntu.org/projects/gitrevision-download/wiki working properly, I needed to override source:trunk/app/views/repositories/revision.rhtml</p> <p>see:</p> <p>http://redmine.debuntu.org/projects/gitrevision-download/repository/revisions/master/changes/app/views/repositories/revision.rhtml</p> <p>I would appreciate to have this hook called from source:trunk/app/views/repositories/revision.rhtml as this would prevent overriding customized redmine UI.</p> <p>It is somehow a follow up on #2073 Tks</p>
