News should appear in the parent project, like they are in the activity view and also at Main page (home).

journals

Agreed. I just reorganized 52 projects into a project tree.

Versions, activity, and most other items work perfect and allow a much better overview of all of the work. I was surprised that the news did not flow the same way.

It is natural to display subprojects' news with paratent's news.

So I wrote a patch to fix it.

Updated the patch to fix a small bug;

Very nice, many thanks.

News are also showed in the overview tab. This patch seems missing that.

News are also showed in the overview tab. This patch seems missing that.

Fixed it.
Thank you for pointing it out.

Ooops,

Updated the patch to fix a little bug
