It wold by important to me if where possible to link a specific version of a Wiki page.
ie
Page Name@44

This wold link to http://redmine..../Page_Name?version=44

This can be very useful if you need to "connect" two interdependent documents, and if one of them is changed the other remains linked to "correct" version.

journals

I agree, the ability to link to a specific version of a Wiki page could be really useful.

Perhaps this patch is helpful. It doesn't cover single-page wiki export and I shamelessly ignored the test suite.
