説明 Hello, We do not have dependent list box in redmine. Basically I want to have a list box whose value depends on the value of another list box. For example. Lets Say there are two list boxes Status and State. State - List box have values 1. Open, 2. Closed, 3. Oh-Hold So based on this state list box value, the status list box values must change. Can this be implemented? Thanks, Deepak.			
journals +1 Can anyone kindly update on this?
