説明
Would probably be just a star displayed right before or after the issue ID. Next we would turn it into a clickable image like in Gmail to watch/unwatch issues.

journals
Why do you need it as a seperate column on the issue-list? It is already possible to watch/unwatch issues from the issue-list by using the right-click context-menu.

related_issues
relates,New,29894, View watchers on the issue list
duplicates,Closed,12083,Could you make the check box column on 'watch' function to Issue list.
duplicates,Closed,12644,Display watch status in ticket list
