説明

I've searched the issues, wiki and forum but couldn't find any help regarding an issue when inserting hyperlinks:

When you insert a link that ends with a symbol, e.g. "!" or "%", then the Wiki interprets this as punctuation rather than as part of the hyperlink. I've tried various ways of encapsulating the link but none seems to work.

Example:

http://es.farnell.com/yageo-phycomp/can4311129200431k/antena-12-x-4-433mhz/dp/1282674?crosssellid=1282674&crosssell =true&in_merch=truex%x%

journals

I just have got same kind of wiki formatting issue with the 'source' tag and filenames containing whitespaces in the repository (unfortunately). Only first part of urls where considered links. I tried to replace the spaces with %20; html entities but they got escaped. It's the same for usual hyperlinks:

source:trunk/example_file name

http://www.redmine.org/example_file_name

Not exactly the same problem as you reported but your proposal would fix it too.

Eric

I don't found this bug... If i write a link with %20 instead of space the the url is correct.. example:

2024/04/25 1/2

http://example.domain.tld/apple%20pear coool
I get an url: http://example.domain.tld/apple%20pear << with space

and a strng "coool" [exclude url]

'Hyperlinks with "%" or "!" at the end'

fixed at

http://github.com/Yitsushi/redmine/commit/5f57471d9c4ad4cf74042242bc697841b65 <u>16703</u>
