説明

When I add an item as a related issue or subtask that change does not show in the activity list. I think a logical connection like this should show up on the activity list.

e.g.

03:31 pm Infrastructure #20 (new): go faster; a sub task of Feature #15 (new): X

03:31 pm Defect #21 (new): bad bug; is blocking Feature #15 (new): X

(i am running 1.0.1.stable)

journals

and option like "notify on all child activitiy" and "notify on all parent activitiy" could be nice. maybe there is the option of extending this to "up to nn levels".
