When the version of a subproject's issue is shared with projects, the subproject' issue is not shown in the subproject's gantt. (Shown only in the parent project's gantt)

The behavior changed after the gantt rewrite.

journals

+1

I've just installed the development release to see how the new gantt feature works and experienced the same issue.

- when viewing the gantt chart of the parent project you get:

```
master   project
     ¦ -  shared  version  (created  on  master  project)
     ¦               ¦--  issue  created  in  master  project  (target  version  assigned  to  shared  version)
     ¦               ¦--  issue  created  in  subproject  (target  version  assigned  to  shared  version)
     ¦
     ¦   subproject
```

instead of

```
master   project
     ¦ -  shared  version  (created  on  master  project)
     ¦               ¦--  issue  created  in  master  project  (target  version  assigned  to  shared  version)
     ¦
     ¦   subproject
               ¦ -  shared  version  (created  on  master  project)
                              ¦--  issue  created  in  subproject  (target  version  assigned  to  shared  version)
```

Could someone try this patch at #7456 ?

Etienne

I tested the "gantt_filters.patch":http://www.redmine.org/attachments/5281/gantt_filters.patch at #7456 , and confirmed this issue was fixed.
I appreciate your work.

Thank you

Fixed in r5077.
