<b>説明</b>			
journals			
<p>After a few tests, moving to Rails 2.3.10 is pretty straightforward.</p> <p>It breaks one test (@MailHandlerTest#test_add_issue_with_japanese_keywords@), because of the updated TMail (1.2.3 -&gt; 1.2.7) vendor'd in action_mailer. The fixture email doesn't get unquoted at all. I was able to fix it by disabling @TMail::Unquoter.convert_to_with_fallback_on_iso_8859_1@ that is added in 1.2.7.</p> <p>It seems that deprecations introduced since Rails 2.3.5 can be easily fixed as well.</p> <p><b>Locales will be changed to use %{key} instead of {{key}}. All pending translation patches need to be committed before.</b></p> <p>Some of us closed issues related to Rails 2.3.8 (especially ActiveRecord 2.3.8 if I remember correctly). Maybe it would be a good idea to have a look at them when the upgrade is done (#6193, #6218, #6673 at least).</p> <p>For the i18n upgrade, there's already an open ticket (#6495), pointing to my tiny note in "#5608": <a href="http://www.redmine.org/issues/5608#note-18">http://www.redmine.org/issues/5608#note-18</a>.</p> <p><b>If I can help on specific points, let me know.</b></p> <p>Jean-Baptiste Barth wrote:</p> <p style="padding-left: 40px;">If I can help on specific points, let me know.</p> <p>It would be great if you could make sure that these errors do not occur with 2.3.10.</p> <p>It was decided to keep 1.1 using Rails 2.3.5.</p> <p>2.3.11 is "out":<a href="http://weblog.rubyonrails.org/2011/2/8/new-releases-2-3-11-and-3-0-4">http://weblog.rubyonrails.org/2011/2/8/new-releases-2-3-11-and-3-0-4</a></p> <p>Upgraded to Rails 2.3.11 in r4904.</p>			

We still force i18n 0.4.2 to load before Rails to avoid further compatibility problems with future i18n releases and/or Redmine plugins that use the old syntax.

Note that Mongrel 1.1.5 does not work anymore with Rails 2.3.8 or later because of 2 bugs respectively in rack 1.1.x and Mongrel 1.1.5.

See "ticket 4690": <https://rails.lighthouseapp.com/projects/8994/tickets/4690> in Rails tracker and "ticket 5": <https://github.com/fauna/mongrel/issues#issue/5> in Mongrel's.

Until Mongrel 1.2.0 is out, it is required to add a "mongrel.rb": <https://gist.github.com/826692> initializer to @config/initializers@.

---

Weird. I opened a new defect for this, see #7688

edit: s/7668/7688/ sorry..
