説明

To reproduce:

- 1. File a new issue (leave the issue category empty)
- 2. update the issue and select an issue category

It is expected to see the assignee field to be changed automatically with the one specified in issue category. But it turns out that the assignee remains empty.

journals

Actually, the current behaviour is to set the assignee automatically on issue creation only, as requested in #382. This is also described in the [\[\[RedmineProjectSettings#Issue-categories|guide\]\]](#).

Thanks for the reply, and it would be nice if we can add the feature because the testers sometimes forgot to select the category and will try to update it later, but developers got no email notification.

#20429 says if assignee field is disabled, no change of assignee in issue updating is confusing.
