<b>説明</b>			
<p>It is essential for my work the possibility of filtering issues from date to date using a calendar tooltip. I will try to make a patch but it is not so simple. There are two issues related with this: 4502 and 4729</p>			
journals			
<p>It could be resolved by #1140</p> <p>This is not the solution. I need a filter from date to date and not x number of days from today as you can do with the actual filter capabilities.</p> <p>It is an essential filter requirement and it is a surprise that is not yet implemented.</p> <p>Resolved with an excellent plugin: "redmine_extra_query_operators": <a href="http://www.redmine.org/plugins/redmine_extra_query_operators">http://www.redmine.org/plugins/redmine_extra_query_operators</a></p>			
+1!			
I vote for this feature too!
