説明

If you log on the demo server (demo.redmine.org) and go to the overall Gantt Chart (projects -> view all issues -> Gantt), you can see the Gantt (truncated) for all projects.

Now if you click "add filter", select "Project" and choose any project, then click "Apply", the updated Gantt chart does not filter anything. It still shows all the projects.

Furthermore, clicking on the drop down "+" and doing a multiple selection in the list does not filter for these choices either.

It seems that other filters are not working either. For example, if you choose to filter for assignee and select one, the resulting Gantt is modified but does not seem to filter for the proper user.

This function is crucial for our installation to be able to filter for multiple/single projects and for assignee.

journals

This behavior makes sense as you are in a multi-project view.

To get a per-project Gantt display, you can select first the project (in projects list or by using the fast-access project combo) then go to the Gantt tab.

It filters just fine in the "Issues" view, even when viewing everything, but not in the Gantt view. So the behaviour should do the same filtering in Issue list or Gantt format, which it doesn't.

And if you select only one project, you cannot select a few projects, which is doable in the Issues view but once again not in the Gantt view.

No filter seems to be working at all in the gantt view for all activities.

i can confirm that the filters are not working in the gantt charts here too (Redmine 1.1.0.devel.4732 (MySQL)).

If I choose to filter on a specific assignee, the only issues displayed are the ones assigned to him, what about you (with devel) ?

By the way, I guess Gantt view should care especially about Project filter ; attached patch adds this consideration.

Better one

Don't you plan to make patch that doesn't show projects on gantt when this projects don't

have issues with assignee set in filter?

This is kind of what is described in #7314 / #3814 (which should be reopened, imho)

Fixed version filter lacks an operator "status is".

Could someone try this patch at #7456 ?

Filters fixed in r5077.
