```
Ruby version             1.9.2 (i386-mingw32)
RubyGems version         1.3.7
Rack version             1.0
Rails version            2.3.5
Active Record version    2.3.5
Active Resource version  2.3.5
Action Mailer version    2.3.5
Active Support version   2.3.5
Application root          C:/Ruby/redmine
Environment              production
Database adapter          postgresql 8.2
Database schema version   20101114115359
```

When exporting an issue to PDF we are getting a string to integer error

TypeError (can't convert String into Integer):
lib/redmine/export/pdf.rb:246:in `block in issue_to_pdf

I've tracked the problem down to the MultiCell command, if I change it to Cell then it works OK but only prints on a single line.

After a little digging around I found the MutliCell command in the fpdf.rb file. I tracked the problem down to the following command

l=l+cw[c[0]]

I'm no Ruby developer so I wasn't sure of the fix but I could understand what it was trying to do, so I change the line to the following

l=l+500

I appreciate this will not fill the width of the document but its pretty close.

Is there a "proper" fix?

journals

Sorry, code in preformatted tags

l=l+cw[c[0]]

1.1.0 is not compatible with ruby1.9.2 but this error is fixed in trunk.
