When updating an issue:
If you choose a value for type of time spent and/or type a comment for that time in the Log Time section of the Issue update screen, but do not enter a time, your comment and time type is silently dropped and lost.  This could lead to people thinking that their time entry has gone through when it should be complaining about the missing value.

This does not happen on the 'pure' Log Time screen for an issue, which rightly complains when something is missing.

This happens on my installations as per below, but is also easily demonstrable on the latest Demo Redmine instance.

```
About   your   application's   environment
Ruby   version                      1.8.7   (i386-mingw32)
RubyGems   version              1.3.7
Rack   version                      1.0
Rails   version                      2.3.5
Active   Record   version         2.3.5
Active   Resource   version       2.3.5
Action   Mailer   version         2.3.5
Active   Support   version        2.3.5
Application   root               c:/redmine
Environment                       production
Database   adapter              mysql
Database   schema   version      20100819172912

About   your   Redmine   plugins
Redmine   Graphs   plugin       0.1.0
Redmine   Charts                   0.1.0
```

### journals

Fix for the comment field committed in r5110.

## It's different for the activity field because it may contain a default value. I'm not sure that we should complain if the user has just changed this field.
