説明			
The @root_id@, @lft@, @rgt@ columns of @issues@ table, as well as @lft@ and @rgt@ of @projects@ table should be defined as @NOT NULL@.			
This could prevent users from running Redmine with corrupted data due to a wrong db migration by import/export.			
journals			
<p>Hi Etienne,</p> <p>I just found this on the roadmap.</p> <p>Any news on this issue? :-)</p> <p>Still here</p>
