説明

I tried to change my email notification settings on My account page.
I set 'No events'. I expected I didn't receive any updates about issues.
But email notifications are received if someone add me as watcher.
I didn't found any explanations about this behavior of Redmine.

So I suppose this is a possible bug.

journals

Did you run migration (a.k.a. @rake db:migrate@) ?

Redmine is updated by our administrators using this page:
<http://www.redmine.org/projects/redmine/wiki/RedmineInstall>

I will ask them about migration.

I asked our admins and they confirmed that updates had installed using Redmine instruction.

It's a bug as @ActAsWatchable#watcher_recipients@
(source:trunk/vendor/plugins/acts_as_watchable/lib/acts_as_watchable.rb#L39) does not take account of user's notification preferences.

Typo

Fixed in r5004.

Merged in 1.1-stable.
