説明			
Use unless or until in control structures instead of if ! or while ! where it improves readability.			
journals			
I think @if blah.present?@ is easier to read than @unless blah.blank?@ or @if !blah.blank?@, so we might switch to this in some cases you point out.			
yes that does makes more sense indeed. I looked it up "here": http://api.rubyonrails.org/classes/Object.html#method-i-present-3F , present? is internally defined as !blank?
