**説明**  
A undo delete or a Recycle Issues Bin (like Windows) only for admin. I think this new feature would be very interesting.

workaround  
same as redmine-org-1380

journals  
I agree. +1 vote on this

Don't let user "delete issues" (unset the right except admin) just only close them and u won't have to restore them.

If the admin need this option.

+1. This is useful in case of a deletion mistake.

+1, because I just deleted all issues in a milestone by accident, since they were defined as sub-tasks of the issue I deleted.

+1 I have deleted issues by accident.

Man, what a fine piece of software. 3 years and still this issue is not done.

bwahahahahh, so true! =>

+1 to this feature, actually. Would be awesome.

Yes,, admin made mistake delete a issue. and then want to bring it back.

and no email notification configured, so i have no any history information about the deleted issue.

+1

+1

yes please

+1

+1

+1

+1 and it should go to right-click, what if someone accidentally closes hundreds of issues...

The undo/restore should restore issue to previous state, based on journal!

+1 not only for issues but also wiki pages, news etc.
