説明

Currently on a roadmap page, e.g <http://www.redmine.org/projects/redmine/versions/27>, the Issues by pull down only has a few options. I think it would be very helpful to add in 'by status' to that list.

What I am looking for is a quick way to gauge the overall status of the issues in a release. I could save a query for this, but it seems like a natural fit to have this ability on the overall page for a given target version.

journals

Added in r5179.

Thanks Jean-Philippe!
