説明

Colorful indentation of subprojects must be on right in RTL locales. But currently it is placed on left regardless of locale's direction.

journals

The attached patch should fix it.

Provided patch doesn't fix the issue completely. There are still problems with margins and multi-level project hierarchies.

New patch fixes the colorful indentation as well as "my projects" mark (star) placement for RTL locales, which is currently on left while should be on right.

The new patch (attachment:redmine-css-rtl-hierarchies-fixes.diff) fixes these for RTL locales:

- Colored indentation of projects view
- Positioning of "my project" icon (start) in projects view
- Positioning of icons in administration page
- Positioning of OpenID icon in URL input field
- Hierarchy view of projects in /admin/projects

* Hierarchy view of subtasks

And this new one adds another fix: hierarchy of Wiki TOC items.

I guess title of the issue should be changed.

Ebrahim, I pulled your bitbucket mercurial repository, and transplanted revisions and pushed to Redmine subversion repository. Thanks.
