説明

I have being used for long time option "Only for things I'm assigned to" to redux amount of messages. But this option isn't satisfying, because I want to have notifications when someone in my QA team assigne me a bug but also I want to be notified when someone make me watcher of a bug (for example because another developer want my opinion about a question)

Redmine should be offer also an option like this "Only for things I watch or I'm assigned to".

journals

related to #8241

I think this is resolved since a few versions, isn't it?

I'm still over redmine 1.4.0 and email notify when cc:me isn't fix. It's fixed in following release?

The option you need is ??Only for things I watch or I'm involved in??.

I don't know if "cc:me" means "someone adds me as a watcher" but, with this option, an email is sent at each issue update; no email will be sent simply to tell the watcher he's been added as a watcher if there's no issue update.

No!

I don't know if "cc:me" means "someone adds me as a watcher"

Yes, it's: I want to be notified when someone add me as watcher with no others update on issue

-deleted-

Sorry, it was a mistake, there is no "Someone added me as watcher" notification.
