説明

use as `!{{backlinks}}` or `!{{backlinks(Foo)}}`. sort-a hack-it-yourself for the fearless

#XXX insert at end of Definitions in lib/redmine/wiki_formatting/macros.rb, after other macroses

#XXX svild: part from child_pages, part from SearchController.index, part from render_page_hierarchy

```
desc "shows backlinks to the/a wiki page. Example: /n/n  !{{backlinks}} or !{{backlinks(Foo)}} "
```

```
macro :backlinks do |obj, args|
```

```
  title = nil
```

```
  if args.size > 0
```

```
    page = Wiki.find_page(args.first.to_s, :project => @project)
```

```
  elsif obj.is_a?(WikiContent) || obj.is_a?(WikiContent::Version)
```

```
    page = obj.page
```

```
    title = 'here'
```

```
  else
```

```
    raise 'With no argument, this macro can be called from wiki pages only.'
```

```
  end
```

```
  raise 'Page not found' if page.nil? || !User.current.allowed_to?(:view_wiki_pages, page.wiki.project)
```

```
  r,c = WikiPage.search( "[["+page.title, @project ,
```

```
    :all_words => true ,
```

```
    :titles_only => false
```

```
    #,:limit => 100,
```

```
    #,:offset => 0
```

```
  )
```

```
  title = page.pretty_title if title.nil?
```

```
  content = "
```

```
    content << "links to " + title + " : "
```

```
  #content << "
```

```
  "
```

```
  r.each do |p|
```

```
    #content << "
```

```
  • "    content << link_to( h(p.pretty_title),
```

```
    { :controller => 'wiki', :action => 'show',
```

```
    :project_id => p.project_id, :title => nil)    content << " /n"    #content << "
```

```
  #content << "    content << link_to( h(p.pretty_title),
```

```
    { :controller => 'wiki', :action => 'show',
```

```
    :project_id => p.project_id, :title => nil)    content << " /n"    #content << "
```

```
  /n"    content    end
```

journals

Would be great to have backlinks in Redmine wiki!

Hi. I've put the functionality into the plugin for those interested in the backlinks feature:

https://github.com/Yrwein/redmine_backlinks

In fact it's rewritten code above (we've used a modified version of the patch in previous versions of Redmine, but it was removed after upgrade) with possibility to show backlinks on every wiki page without macro call.

+1

I would also love to have the possibility to search for backlinks in a subtree of a wiki.
