説明
Bug after deleting a project

In the administration panel, after deleting a project, when I go on the link in list of consulting projects, it appears this error:
None of the range-specifier values in the Range request-header field overlap the current extent of the selected resource.

journals
Requested Range Not Satisfiable
None of the range-specifier values in the Range request-header field overlap the current extent of the selected resource

i get this problem suddenly when I go redmine/admin/info page..
any ideas?

416 Requested range not satisfiable

I'm not sure redmine uses headers that could lead to such an error, can you give some details about your setup (see [[SubmittingBugs]]) and confirm if it happens on a fresh install ?
