I found the solution to link to a file in a specific branch of the linked git repository:	However, there	currently is no solution to linl	k to a file in a spe	ecific git branch.	
	I found the solution to	link to a file in a specific branch of the link	ed git repository:		

source:"../revisions/branch\_name/entry/path/to/the/file"

Simply replace branch\_name by the name of the specific branch and replace the path of the file at the end.

## You must put the quotes around the path, otherwise the .. will not be parsed correctly.
