説明

At revision 7655, wiki links with inline markup in label text display html tags instead of styled text.

For example, [Logo and Icon](#) is rendered as @Logo and Icon@.

Downgrade to revision 6262 (version 1.2.1) fixed the problem.

journals

This was introduced with r7248 (#9252).

Fixed back with r7698, thanks for reporting it.
