説明

After recently upgrading to Redmine 1.2.1 + patch #4905 and moving from Mongrel 1.1.5 to Passenger 3.0.9 (using Ruby 1.8.7 as packaged in Ubuntu's ruby1.8 1.8.7.249-2 package, for amd64), I started getting rogue processes which used up 100% CPU every now and then. Killing these rogue processes using "kill -SIGABRT pid" produced entries like these:

```
Processing RepositoriesController#annotate (for 10.182.221.1 at 2011-10-28 01:51:08) [GET]
  Parameters: {"action"=>"annotate", "id"=>"sources-fm", "path"=>["trunk", "xmleye-1.2.3_svn473-bpelunit_results.tar.gz"], "controller"=>"repositories"}
  Rendering template within layouts/base
  Rendering repositories/annotate

ActionView::TemplateError (SIGTERM) on line #17 of app/views/repositories/annotate.rhtml:
14:
15: 16: <% line_num = 1 %> 17: <% syntax_highlight(@path, to_utf8(@annotate.content)).each_line do |line| %> 18: <%
revision = @annotate.revisions[line_num-1] %> 19:20: <%= line_num %>
```

Could you add a test such as `source:tags/1.2.1/test/functional/repositories_filesystem_controller_test.rb#L115`?

I'm glad you liked the patch. Sorry I forgot to watch the issue and didn't see your message until now. I write it tomorrow. It's midnight right now in Spain. Basically, I just need to test that the proper error is shown when trying to annotate a file that is too big, right?

Yes. Please see `source:tags/1.2.1/test/functional/repositories_git_controller_test.rb#L306`

I have revised the patch with a new test case for the Subversion test suite. I had to change the new code a bit as well, as it was breaking one of the functional tests for Git repositories. It seems that with the 0.9 patch a different error message would have been shown when trying to annotate binary files.

I have tried this one with 'rake test RAILS_ENV=test' using a SQLite database: all the tests seem to pass. I haven't run the tests that require an LDAP server, though.

Committed in trunk r7728 and r7729, thanks.
