説明

Hi

I have migrated my Redmine 1.0.2 to 1.2.1. Everything was good and the migrate DB generated no error or warning, For the testing purpose i ran the redmine in webrick
The login page appear and I can login, but the next page got a 500.html error with the folling log.

Please help me its urgent

Thanks
Shahul

ERROR LOG IS:

ActionView::TemplateError (can't convert Fixnum into String) on line #43 of app/views/layouts/base.rhtml:

```

journals

You upgraded to 1.2.1 but you report this issue against 1.2.3. So what version are you using?

And please, don't assign issues.

sorry, i have upgraded my redmine from 1.0.2 to 1.2.3

Hi i have the same issue.

I upgraded from 1.0.1 to 1.1.3.

I found out that all project related templating e.g. "link_to_project", "render_project_jump_box", ..., is not working.

Is that maybe an ruby package with an false version?

My installed packages are:

actionmailer (3.2.1, 2.3.11)
actionpack (3.2.1, 2.3.11)
activemodel (3.2.1)
activerecord (3.2.1, 2.3.11)
activeresource (3.2.1, 2.3.11)
activesupport (3.2.1, 2.3.11)
acts-as-taggable-on (2.1.1)
arel (3.0.0)
builder (3.0.0)
bundler (1.0.21)
daemon_controller (0.2.5)
erubis (2.7.0)
fastthread (1.0.7)
file-tail (1.0.5)
hike (1.2.1)
i18n (0.6.0)
journey (1.0.1)
json (1.6.5)
mail (2.4.1)
mime-types (1.17.2)
multi_json (1.0.4)
oniguruma (1.1.0)
passenger (3.0.2)
plist (3.1.0)
polyglot (0.3.3)
rack (1.4.1, 1.2.1, 1.1.3)
rack-cache (1.1)
rack-ssl (1.3.2)
rack-test (0.6.1)
rails (2.3.11)
railties (3.2.1)
rake (0.8.7)
rdoc (3.12)
sprockets (2.1.2)
spruz (0.2.2)
textpow (0.10.1)
thor (0.14.6)
treetop (1.4.10)
tzinfo (0.3.31)

Thx for the help.

OK, found. You must have at least one project with a legacy numerical identifier (which is no longer valid).
The fix is committed in r8804, but it can be easily applied locally:

Index: app/models/project.rb

```
--- app/models/project.rb      (revision 8776)
+++ app/models/project.rb      (working copy)
@@ -274,7 +274,7 @@
     def to_param
       # id is used for projects with a numeric identifier (compatibility)
-      @to_param ||= (identifier.to_s =~ %r{^\d*$} ? id : identifier)
+      @to_param ||= (identifier.to_s =~ %r{^\d*$} ? id.to_s : identifier)
     end

     def active?
```

This patch is against current trunk but you should be able to locate this piece of code in 1.1.3 or 1.2.3.

Alternatively, you can change your project identifier(s) to non-numerical ones.

Hi thx for the fix,

i found the problem by my self and added before all numeric identifiers a letter. ;)

But i spent 4 hours to found it. xD

thank u so much Jean-Philippe Lang, the issue has been fixed and its works for me

Thanks
Shahul

Merged. Thanks for the feedback.
