説明 It is powerful to be able to create a date field, and would be even more so if one could see these in the Calendar. I'm using this for a check-back date.			
journals			
FYI, this feature is going to be included into "Extended Fields": http://projects.andriylesyuk.com/projects/extended-fields 0.2.2...			
Any chance to get this feature for redmine >=3.4 ?			
Thanks
