#### 説明

I have a isse created. Then I open the issue details and a a relation to an other issue:

- Related issues: add,
- select 'follows' in pulldown menue
- key in issue no
- key in 1 into field 'Delay'
- Select 'Add' button

Expected: Relation is shown to other issue no

Displayed: No relation is shown. (This error does not always appear..!)

But: After refreshing of browser the relation is shown

Used:

Firefox 10.0.2 (also found on earlier versions)

Redmine 1.3.0.stable (also on Redmine 1.3.1.stable 8857)

Ruby version 1.8.7

Ruby Gems 1.6.2

Rack 1.1.1

journals

I confirm in Redmine 1.3.2 and in trunk r9244.

Note that I have installed redmine\_better\_gantt\_chart plugin 0.6.3.

Note: I also have some plugins installed:

- redmine\_better\_gantt\_chart V 0.5.0
- redmine\_issue\_due\_date 0.1.0
- redmine\_better\_gantt\_chart 0.5.0 and others..

Please try without plugins.

Redmine trunk r9258 without plugins.

It seems that the problem reproduces when the issue has not any relations added and the first relation that is added is of follows type.

If a relation of other type is added first, then it and the next relations of any type are added and displayed immediately.

Yes, I can confirm the conditions described by Ivan Cenov

for occurence of disappearing new relations.
