Would be nice to be able to:

confine search results to those adhering to a set of filters or, probably even better...

allow the filtering page to allow, as is possible with custom fields, normal fields to be added to the filter choices, so that issue description and the like (as well as ideally a catch-all "search everything" filter) could be exposed for restricting result sets.

journals

Pls, see also Feature #10294: *Redmine search: improve, make better and smarter: (title matching first, then content)*
