Subscript and superscript works fine in all redmine text areas, but only if you put a blank between the normal and the subscript text.

You can't write proper units at the moment and have to use e.g. $CO~2~$, $m^{2^{\wedge}}$
Although, it is part of the textile standard. It should be written e.g. as $CO[~2~]$ $m[^{2}]$ and it's listed in the linked long help text.
