I have been trying to figure out how to link a phone number so that a mobile user can click on it and call the number. The html code is quite simple however I cant figure out how to make it work in redmine. Any help would be deeply appreciated.

Html Code example: Call us free!</a

journals

Dunno though if it is a (frequently) needed feature for most of the Redmine users.

Supported in RedCloth 4. More about RedCloth 4: #6269
