| 説明 | | | |
| <p>One of the possible new feature that would be great on redmine is to be able to apply restrictions to the date field.</p> <p>For instance :</p> <p>restrict the startdate and/or the enddate of the calendar witch can be an exact value such as "05-05-12" or relative value "-1w" for 1 week less than today</p> <p>It would be great to use it globally in order to forbid to insert a ticket with a date in the past or having a due date witch is not lesser than X days</p> <p>at the custom field part it would be also a great feature to have this possibility</p> <p>Feature List :</p> <ul style="list-style-type: none"> • Add the possibility to restrict the start and/or ending of the calendar shown when setting a date in the date field • The values set for those restrictions can be fixed (YY-MM-DD) or relative (+1w, -1y, +500d, ...) <p>The popup calendar of the date field is very limited and use a code that will not evolve.</p> <p>jqueryui's datepicker can be used for this : http://jqueryui.com/demos/datepicker/#icon-trigger</p> <p>Localizations of datepicker : http://jquery-ui.googlecode.com/svn/trunk/ui/i18n/</p> <p>Best regards</p> | | | |
