説明

Rails 3.2.5 has been released. Gemfile should be updated

journals

BTW, it should be

gem 'rails', '~> 3.2.5'

There are failures/errors with Rails 3.2.5, I'm working on it. But we can't just upgrade the Gemfile.

I've also filled a bug for something that looks like a regression:

<https://github.com/rails/rails/issues/6609>

2.0-stable upgraded to Rails 3.2.5.
