説明 If there is a custom field named @MyCustomField@ (List) with allowed values "A" and/or "B" (multiple values allowed), I want the possibility to set "A" and "B" as default. Background: We enabled receiving mails in redmine (via @rdm-mailhandler.rb@) and I can't set @MyCustomField@ (required) to multiple values via mail. Redmine: 2.0.2.stable.9835 journals +1 For info: I developed a patch for "Planio":https://plan.io to allow setting multiple values for list custom fields in emails in #16549-1. +1! related_issues relates,Closed,16549,Set multiple values in emails for list custom fields
