説明 Rake task "redmine:send_reminders" only send notifications for tickets assigned to users, if the ticket is assigned to a group, users in that group don't get notificated. It's discussable but IMHO is a must for teamwork. In addition there's no way to especify a group_id in the rake task. journals Fixed in r10335. Still present in Redmine version 2.6.3.stable.14166 Michal Kowalski wrote: Still present in Redmine version 2.6.3.stable.14166 Do not post on closed issue. Check your mail addresses of list are all valid (#8157).
