It would be useful to be able to configure automatic "done ratio" calc per project. In some cases we need it calculated by status, for other by issue field.

journals

This seems to relate to #7545. Not the same, but things which could be introduced together.

+1 we need it calculated by status, for other by issue field

Any update on this requested feature? It would be really useful if we can select this per project.

+1

+1, we have many distinct projects with different policies: this feature would be really useful. Any update?
