説明

Hi there,

I encountered some misbehaviour, regarding ticket status and sourcecode management.

Ways to reproduce:

1. Create a new Ticket (ticket status => new)
2. Create a commit which change the ticket status (default configuration: fixes #...) (ticket status => resolved)
3. Edit your new ticket (add a note) (ticket form shows ticket status => new)
4. If you save this this new note, the ticket has the status new again!

Hope this helps to find the corresponding bug.

Best regards,
Daniel
