説明

There is currently no way for a user to find out who is a member of which groups. I would like this page (and the individual group pages) to be visible by non-admin users (although obviously not editable):
<http://demo.redmine.org/groups>

In conjunction with Feature Request #12794 (Member groups not listed in project page), here is how I would see it being used: I open a new Bug Issue for a project and assign it to the group "Database-Developers". When nothing happens with the issue, I want to know who is in that group so that I can talk to them in person.

+1

The following code allows users to see group members according to "Users visibility" setting (#11724) of their role.

```
diff --git a/app/controllers/groups_controller.rb b/app/controllers/groups_controller.rb
index fb21e2f05..68fa826c9 100644
--- a/app/controllers/groups_controller.rb
+++ b/app/controllers/groups_controller.rb

end
```

The attached patches implement the feature.

- A user can see /groups/:id page that displays group members if the group is visible for the user. The visibility of the group follows "Users visibility" setting of roles
- Adds links from group names to /groups/:id page

!{border: 1px solid grey; width: 1024px}.link-from-group-name-to-group-page.png!

!{border: 1px solid grey; width: 424px}.group-page.png!

Updated the patch. Make the page layout consistent with the user profile page.

Setting the target version to 5.0.0.

Committed the patch.

Non-admin users can see group members by clicking a group name on the project overview page.

Go MAEDA wrote:

Committed the patch.

Non-admin users can see group members by clicking a group name on the project overview page.

Also, the assignee field now shows a link to the group page if the assignee is a group (r21075).
