<b>説明</b>			
<p>Can a future release combine js and css files into a single file, and use the html5 async attribute? These seem like very simple ways to improve performance.</p> <pre>javascript_include_tag :all, :cache =&gt; true, :async =&gt; true stylesheet_link_tag :all, :cache =&gt; true</pre> <p>I made a similar post in the forums.</p> <p><a href="http://www.redmine.org/boards/1/topics/35506">http://www.redmine.org/boards/1/topics/35506</a></p>
