Currently, the issue visibility can be set by role with 3 options only:

All issues

All non private issues

Issues created by or assigned to the user

It's better if can enable/disable the issue visibiltiy to a role by issue tracker and its status in the workflow setting.

As I hope one tracker issues is invisible to developers (a role) untill the status changes to "Reviewed", like following matrix:

¦Tracker¦Status¦Role¦Visibile¦
¦Requirement¦New¦Dev¦N¦
¦Requirement¦Reviewed¦Dev¦Y¦
