説明 Do you have an idea how to build custom field like below: http://railscasts.com/episodes/88-dynamic-select-menus It would be great custom field.	
workaround use view customized plugin http://blog.enjoyxstudy.com/entry/2016/04/03/000000	
journals More likely a feature request than a patch. This is in part related to #6717 which talks about populating the CF value list dynamically.
