<b>説明</b>															
<p>The "Roles and permissions" screen has many options. But if I restrict access to certain types of information, those items still show up in the "Activity" tab when that user is logged in.</p> <p>For example: I created a role "Customer" that has no access to the repository. However, users with that role can still see revision commit activity from subversion in the Activity tab. They can also see issues they don't have access to.</p> <p>Environment:</p> <table> <tr> <td>Redmine version</td> <td>2.0.3.stable</td> </tr> <tr> <td>Ruby version</td> <td>1.8.7 (x86_64-linux)</td> </tr> <tr> <td>Rails version</td> <td>3.2.6</td> </tr> <tr> <td>Environment</td> <td>production</td> </tr> <tr> <td>Database adapter</td> <td>MySQL</td> </tr> </table> <p>Redmine plugins:</p> <table> <tr> <td>redmine_mylyn_connector</td> <td>2.8.2.stable</td> </tr> </table>				Redmine version	2.0.3.stable	Ruby version	1.8.7 (x86_64-linux)	Rails version	3.2.6	Environment	production	Database adapter	MySQL	redmine_mylyn_connector	2.8.2.stable
Redmine version	2.0.3.stable														
Ruby version	1.8.7 (x86_64-linux)														
Rails version	3.2.6														
Environment	production														
Database adapter	MySQL														
redmine_mylyn_connector	2.8.2.stable														
<p>journals</p> <p>Where is the use case for this? The user could still get the information.</p> <p>But another idea could be the permission "view activity". Maybe I could provide a patch after my hospital visit.</p> <p>I mark this on my watch list.</p> <p>My use case is I want to give a customer access to specific items without them having visibility into all of the ongoing activities. Thanks!</p> <p>Sounds like this is the same request just different described #13512?</p>															
<p>related_issues</p> <p>relates,Closed,13512,Add a way to make specific issues visible to a user</p>
